

# PDF Dummy

I am a dummy copy. And I've been a dummy copy since my birth. It took me a long time to realize what it means to be a dummy copy: you make no sense. You stand out now and then by being completely out of context. Often, you aren't even read at all. But does that make me a bad copy? I know that I'll never stand a chance of appearing in the Economist. But does that make me any less important? I'm a dummy! But I enjoy being a copy. And should you now decide to carry on reading me to the end, I'll have managed to achieve something most „normal“ copies don't achieve.
